RESPONSE TO RESTRICTION/ ELECTION REQUIREMENT Address to: Commissioner for Patents P.O. Box 1450 Arlington VA 22313-1450	Attorney Docket	10030712-1
	Confirmation No.	9616
	First Named Inventor	Russell Alan Parker
	Application Number	10/722,950
	Filing Date	November 25, 2003
	Group Art Unit	1762
	Examiner Name	Marianne L. Padgett
	Title	Methods for Treating At Least One Member of a Microarray Structure and Methods for Using the Same

Dear Sir:

This communication is responsive to the office communication dated July 19, 2005.

In the above referenced office communication, the Examiner imposed an election of species requirement, requiring the election of one species and one sub-species for further prosecution in this application:

- (A) Deposition (i.e., permanent coating on the gasket),
Subspecies: (i) Laser deposition;
(ii) Oxide form at functionalization
- (B) Etching or extraction,
Subspecies: (i) solvents: (a) aqueous;
(b) organic-polar;
(c) organic-nonpolar
(ii) Oxygen etch;
(iii) Plasma etch (other than oxygen);
- (C) Modifying without necessary addition or subtraction of material to gasket
Subspecies: (i) Texturing;
(ii) Plasma.

The Applicants hereby elect species (C) and subspecies (ii).

BEST AVAILABLE COPY

Agilent Ref: 10030712-1
United States Application Serial No. 10/722,950

Accordingly, the claims readable on the elected species are Claims 1, 16-18, 25, 26-29, and 53-56.

The Applicants also respectfully urge the Examiner to search all of the groups and species in this application for the following reasons.

The MPEP allows an Examiner to examine otherwise patentably distinct species if to do so would not impose an undue burden on the Examiner. M.P.E.P. § 8.03 states that:

If the search and examination of an entire application can be made without serious burden, the examiner must examine it on the merits, even though it includes claims to independent or distinct inventions.

In the present case, it is respectfully submitted that the search for the claims of the elected species will likely find any relevant prior art relating to the non-elected species.

Accordingly, little, if any, additional searching should be required for the claims of the non-elected species, and therefore the examination of the claims of the entire invention should impose little, if any, additional burden on the Examiner.

As such, examining all of the species of the present application clearly does not impose an undue or serious burden on the Examiner. In the absence of such an undue or serious burden, the Examiner is clearly instructed by the MPEP to examine the entire application. Therefore, the Examiner is respectfully requested to examine all the species together in the present application.
